

EDITORIAL

Dr. Vandana Nalawade-Jadhav
Chief Editor &
Coordinator

It gives me great pleasure to write this introductory note to this UGC sponsored National Seminar Special issue of “**Research Front**” and also to place in your hands. This issue is based on Two Days National Seminar collaborated with Rayat Institute of Research and Development, Satara held on 29th and 30th March, 2015 in our college on “**Role Of Teacher Education Institutions in Right To Education**”.

The editor welcomes papers from scholars and disciplines traditionally associated with the study of right to education as well as papers from those in other disciplines or fields of inquiry which have traditionally been under-represented in the field.

In order to bring the educationally backward youths of rural areas in the main stream of education, Padmabhushan Dr. Karmaveer Bhaurao Patil founded Rayat Shikshan Sanstha. Azad College of Education, Satara is one of the out springs of this Bountiful Banyan. Our college has established a new standard of academic excellence in whole Maharashtra. This college organizes various functions all the time by keeping students and society at its centre. This Two Day National Seminar also arranged by taking these points into account. Especially, the views expressed by Hon. Dr. Ashok Bhoite (Ag. Vice Chancellor, Shivaji University, Kolhapur), Hon. Prof. Dr. Sanjeev Sonawane (HOD and Dean, Faculty of Education, Savitribai Phule Pune University, Pune) and Hon. Shivaji Raut are the real asset of this seminar. However, along with these thoughts, research papers of many other scholars are also included in this journal. I would like to tell that the photographs of our office bearers and important activities of this college have really enriched the very look of issue.

I am immensely happy to record my gratefulness to I/C Principal Dr. B. S. Avaghade and Dr. V. D. Dhondge, Co-editor of this Special issue and also for their encouragement and continued and valuable support to me in the publication of this special issue.

I cannot forget to thank, Dr. R. B. Vhanabatte, Dr. N. D. Dhanwade, Dr. A. B. Patil and Dr. K.R. More who are associated with the publication of this issue for their rendered assistance.

At last, I must thank **University Grants Commission** for providing the grant for this National Seminar and expect the same economical assistance whenever needed. I also thank the Chief Editor of **Research Front** for timely and excellent compilation and publication of this ISSN issue with **Impact Factor 1.115**.

Thanking you all.
